*ARC Management coordinating & participating with Emergency Relief for Mount Semeru volcano eruption, December 2022.*

## FOREWORD from ARCs Chairman:

Assalamualaikum and the warmest greetings to everyone during these global difficulties and challenges.

2023 has come to the end of our second year as a non-profit organization and Amanah Relief Center (ARC) must first thank Allah for allowing us to do this important social work for the people here in Indonesia. We also would like to thank all our donors, partners, and team members for allowing us to achieve beyond our set goals; we are extremely grateful and honored to have been given the Amanah to do this work. This second year as a non-profit organization has been just as challenging as our first year, however in different manners - and yet we were still able to achieve more than expected towards the works – here, in Indonesia.

Now that Amanah Relief Center has established our flag on the ground in several Indonesian provinces, we believe that we have achieved more than just from behind the desk and that being on the ground and participating firsthand has allowed us to expand our groundwork and work directly for the people and expanded our outreach to those in need of the proper social provisions and improvements.

FOREWORD:

*Reviewing & educating the leaders and students on 'how to use the new noodle machine' for an Islamic boarding school in Maluku.*

To see our category of collected works as a whole, we have compiled Amanah Relief Centers' 2023 Annual Report as a documentation outline of our responsibility and trust to our donors, partners, team members, and future investors with full transparency via this documentation report. We aim – with this effort - to provide transparency and accountability for our actions of our financial programs/campaigns; and by doing so, we hope to continue to expand our footprint in Indonesia which will allow us to gain new donors, supporters, and future investors to support Amanah Relief Center's important and ambitious social-economic works.

As Chairman of Amanah Relief Center, I represent the Board of Trustees, the organization associates, and advisors to deliver the introduction of the 2023 Annual Report to the donors and supporters of ARC. *Firstly*, in our second outing as a young, new organization in Indonesia, Amanah Relief Center has been able to grow and expand our social-economic works throughout other parts of Indonesia - both from our management team and the outreach on the ground. We were able to expand into 19 provinces during our Ramadhan Rice campaign and worked with other individuals and organizations to expand our footprint. Alhamdulillah, we reached more people and, in more villages, while we provided more social improvements, which allowed us to continue to expand in the same area and further.

*ARC Chairman with the Elementary school principal and the contractor discuss the five (5) door toilets & wudu facility during the school recess.*

*Local kids experiencing the completion of the 1st permanent bridge built by ARC.*

**Secondly**, we are grateful that our organization is still doing the work that we have set out to do. It is spearheaded by Akbar, Nurul, and Harris - and supported by the full ARC team members - who are pushing with positive motivation and continual encouragement that keeps ARC going. The full ARC team knows that hundreds and thousands of villagers need social improvements injected into their daily lives, especially since we (ARC) know that there is a rough estimation of over 84,000 villages across Indonesia's archipelago landscape that needs to be addressed with basic, social-economic improvements. That is why ARC is dedicated to expanding and reaching into as many areas as possible each day, each month, and each year to accomplish our mission and vision.

**Thirdly**, ARC's ground works have expanded not just because of the support and help from our loyal donors and associated contacts but because we believe that we have built a name of reliability to execute and complete the campaigns at hand. This year - 2023, we joined hands with other organizations that have reached out to us - and to some organizations that we have reached out to collaborate, expand our efforts, and extend our footprint in the circle of social-charity works in Indonesia. We worked with 3x NGOs in the USA and 7x Yayasan in Indonesia including five (5) organizations that collaborated and helped during Cianjur's emergency disasters between late 2022 and mid-2023. ARC worked in the capacity of a) raising the funds, b) managing and coordinating the projects/campaigns - domestically and internationally, c) visiting the locations to document and evaluate the situation, and d) performing the actual works on the ground. ARC has grown tremendously because of the collaborations, and we enjoy the (personal) growth within and external growth through the collaboration efforts with the other organizations.

*Water well crew drilling & installing a water well for Rice Field Farmers.*

*Fourthly*, these last two years have been an eye-opener for ARC - to realize that small steps and small works can make a difference in people's lives, especially in far, out-of-reach villages - which have led to bigger steps and bigger impact for those who have never been given a fair opportunity.

In retrospection, ARC started with several small campaigns in the beginning, and after two years - by the end of 2023, we have participated in 27 different types of campaigns that include and not limited to:

- a) social & economic impact for villagers & villages,
- b) providing an assortment of meals & food staples,
- c) building community structures & facilities,
- d) installing an assortment of water wells to benefit field workers & religious institutions,
- e) providing Islamic knowledge & counseling support,
- f) building collaboration among other organizations, and much more.

Alhamdulillah, we have been fortunate to grow steadily and consistently in hopes of being a leading organization in charity work for the people in Indonesia.

*Kids happily receive Qurbani (goat) meat on Eidul Adha in Pagerbarang, Tegal, East Java.*

*Fifthly*, our small organization has been very fortunate to assemble, manage, and conduct the people's needs from our home offices and implement the groundwork while expanding across the variety of Indonesian islands; being proactive to achieve ARC's common goals. Included in ARC's expansion via the campaigns, we have also expanded our collaborative efforts with other like-minded organizations - domestically and internationally. These collaborative efforts focused specifically on the emergency disaster of Cianjur earthquake of November 2022, which continued into mid-2023; assembling five (5) organizations to combine the collaborative efforts for the Cianjur survivors and their aftermath situations. We continue to keep the open-door policy to continue international and domestic collaborations to help those in need based on the campaign's target and donations.

And finally, the international pool of donors and supporters has been extremely instrumental in facilitating ARC's footprint throughout Indonesia. Our priorities in attracting donors to Amanah Relief Center are many, however, our primary and main principle is for our donors to earn immeasurable rewards with Allah, the Almighty. To know and understand the meaning of the Quran and Sunnah regarding: 'giving with what you have', where we have some donors who donate large amounts, while others donate what they can, and some donate consistently - as monthly donors. Construction crew taking a break from working on the latest bridge.

*ARC Management checking on the clarity of a new rice field water well.*

Alhamdulillah, we want to thank all the donors who have donated to our campaigns which have allowed us to fulfill the campaign quotas quickly and completely and in a timely manner, Allahuma Barak. Amanah Relief Center will always be forever grateful to all the donors.

*ARC's 1<sup>st</sup> Musollah & Community Ambulance  
in Pagerbarang, Tegal, Center Java.*

Amanah Relief Center is extremely grateful for the achievements that we were able to accomplish in 2023, and we hope to continue to develop into the future and invest in the social-economic needs of the people of Indonesia, with Allah's help Insha'Allah. Amanah Relief Center is committed to continuing its approach, actions, and understanding of how to problem solve Indonesian's social issues by not just giving the 'fish' but by providing the 'fishing tools' to better their social & economic environment. We hope that all of you will continue to participate in supporting our efforts and commitment to ARC's work, and spread the word about ARC's tireless endeavors.

We thank all those who have supported us from the beginning and who continue to encourage us to do so. Thanks to the board, associates, advisors, partners, and those in the field for Amanah Relief Center - who worked hard and contributed to our efforts.

We extend our warmest gratitude of 'Thank you' to all. We pray that by reading this annual report, you will find the clarity and transparency of Amanah Relief Center's work to be that of high standings, and as a trust to help those who need their basic social improvement.

Salams.

*Harris Tobing*  
ARC Chairman

## ORGANIZATION PROFILE & TEAM:

Established in 2021 by Dessy Trianni and Oktiyah Hariani in Indonesia, Amanah Relief Center is dedicated to humanitarian endeavors. The organization was founded with the overarching goal of alleviating the challenges faced by those in need and catalyzing positive change within communities. Presently, Harris Tobing leads the organization, supported in operational activities by Akbar Ismail as the secretary and Abdi Muharwan as the treasurer. Amanah Relief Center benefits from the expertise of an advisory board with diverse backgrounds. With a profound commitment to empathy and a focus on creating a meaningful impact, the organization directs its efforts toward a range of charitable initiatives.

Amanah Relief Center remains resolute in its mission to offer essential support, contribute to sustainable development, and empower individuals confronting adversity. Through collaborative efforts between its founders, operational leadership, and advisory board, Amanah Relief Center is steadfastly working to construct bridges of compassion and resilience, with the ultimate aim of fostering a more just and compassionate world.

*An educational event held in the new Al-Amanah Musollahh in Pagerbarang, Tegal, East Java.*

## ORGANIZATION PROFILE & TEAM:

**This category comprises four distinct campaigns aimed at addressing food insecurity and related projects.**

**A total of five campaigns fall under this theme, focusing on initiatives that contribute to community development at both national and international levels.**

**This category involves two campaigns specifically dedicated to providing relief and aid in response to natural disasters.**

Among the eleven campaigns conducted throughout the year 2023, four campaigns have notably garnered significant support, both in terms of donations and impact on the targeted communities. These standout campaigns are as follows:

### **Qurbani Campaign**

In 2023, ARC was able to raise Qurbani funds to provide eight (8) goats and three (3) cows during the celebration of Eidul Adha. The goats are usually focused on feeding villages in Central Java, while the cows are for those in Maluku, specifically feeding Islamic boarding schools.

ARCs focus on helping these specific locations due to the poor conditions of the villages. In Central Java, most of the villagers only get to eat meat once a year – which is by your Qurbani donations. While in Maluku, these villages and Islamic boarding schools are home to the very poor and orphaned, and where villages as a whole have reverted to Islam – up to 100 families accepting Islam per village. NOTE: It is said that 29 villages have accepted Islam since the 80s, in a location that was prone to religious intolerance.

### **Public Toilet Campaign**

While ARC was building bridges, our team discovered that there were several villages with about 100 families that still used the local stream as a bathroom. After some research and discovery, ARC realized that only 40% of the villages had access to bathrooms. So, ARC raised awareness & money, and then designed and built three sets of MCKs which are 3-doors - each with a toilet and space to shower as a public toilet facility. This also included - on the outside wall - a two (or three)-faucet wudu facility area. This has improved their cleanliness for their community and as a human being.

Among the eleven campaigns conducted throughout the year 2023, four campaigns have notably garnered significant support, both in terms of donations and impact on the targeted communities. These standout campaigns are as follows:

### **Ramadhan Rice Campaign**

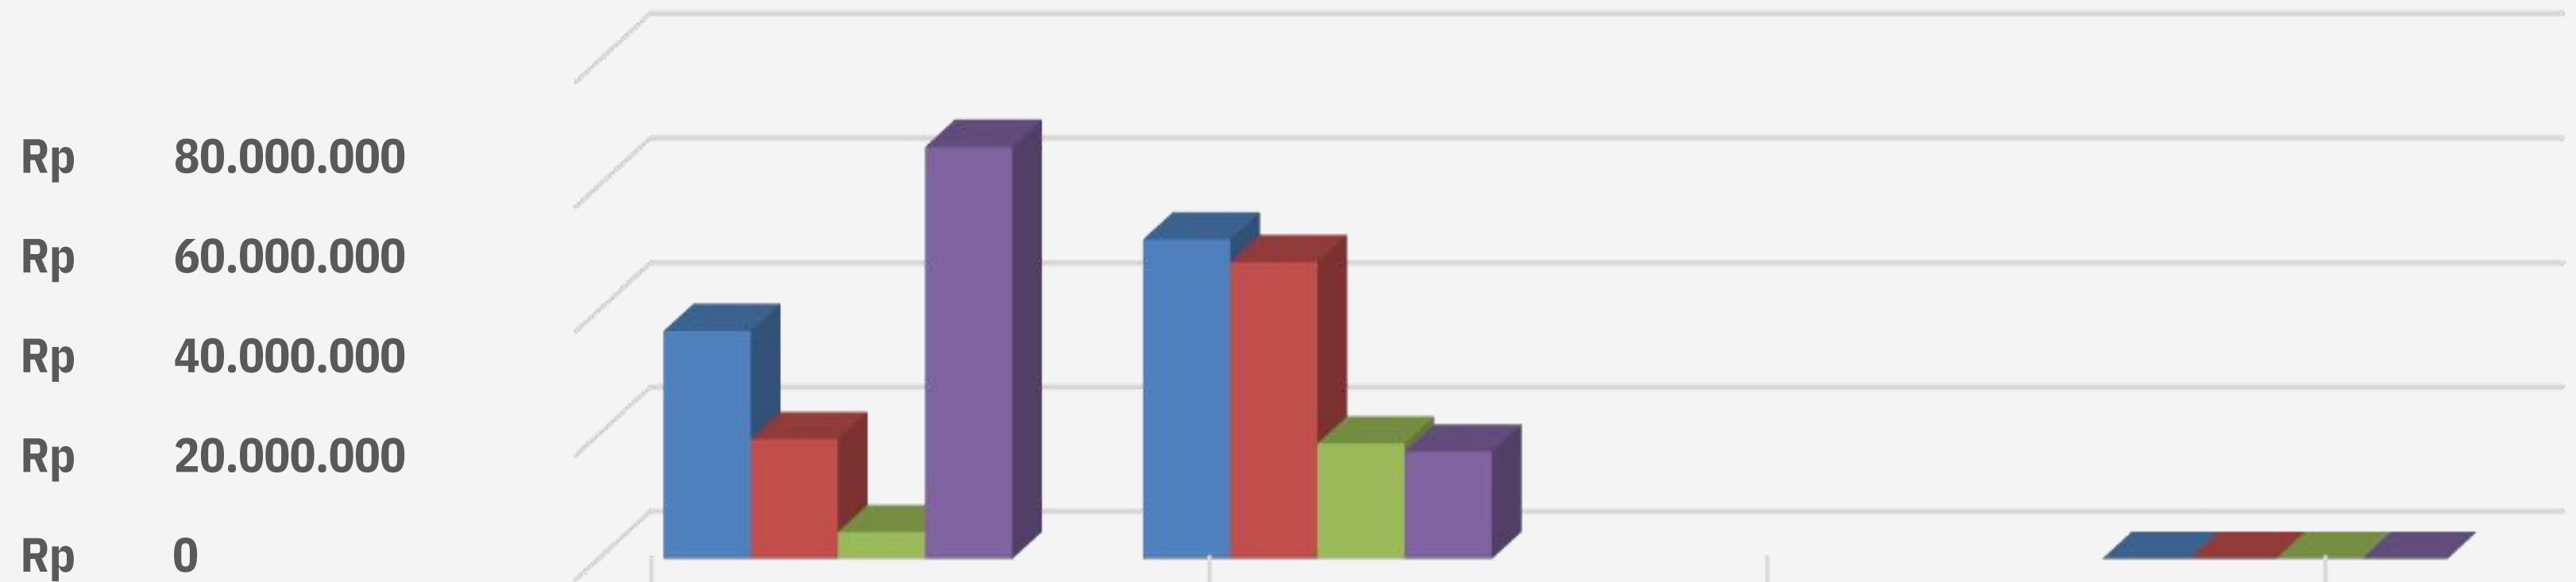

ARC's Ramadhan Rice campaign is our way of giving back to those during a time of hunger; where statistically, over 18 million people go to bed hungry every night in Indonesia. We know that rice is the staple food for the people of Indonesia and we have chosen for the last three (3) years to provide 11 pounds (5 kilos) of rice sacks to be delivered to the poor, widowed, orphaned, and Islamic boarding schools during the month of Ramadhan.

On our first outing, we were able to distribute 300 bags of rice Alhamdulillah. Last year – 2023 – for our second outing, we were able to deliver 977 bags of rice, which was 5 tonnes of rice to nineteen (19) different provinces throughout Indonesia. We were blessed to have the extended team members and other organizations on the ground and working tirelessly to help disperse the sacks of Rice to the needy.

### **Natural Disaster Relief for Cianjur Earthquake – Emergency Disaster**

Our Emergency disaster response to the Cianjur earthquake in late 2022 was immediate from our organization. Alhamdulillah, ARC coordinated a joint effort and collaborated with five (5) NGOs to provide and set up three (3), separate - five (5) door MCK with wudu facilities, and two (2) semi-permanent, 150-person musollah in the heavily stricken earthquake areas. This included raising funds, managing the projects, coordinating the teams, and on-the-ground assessments & works.

	2022	2023	Changes
Qurbani	Rp 36.739.120	Rp 51.432.945	148%
Ramadhan Rice	Rp 19.290.015	Rp 47.781.852	330%
Noodle Machine	Rp 4.324.924	Rp 18.595.472	-74%
Daily Meals	Rp 66.288.588	Rp 17.313.838	-74%

# Community Projects (National and International)

## From Brother Musa – Uganda:

Assalam Aleikum, all presence and thanks are for Allah may His peace and blessings be upon our beloved prophet Muhammad (PBUH). Alhamdulillah I take this opportunity to thank all our brothers and sisters from Amanah Relief Centre (ARC), and our beloved donors who contributed their money to the construction of our freshwater well & purification system in Uganda.

Alhamdulillah, I Musa Muslim - together with my colleague (Team) of Paicho Muslim Center (PCM), and together with the community of Numagumba Village, Mbale District we are grateful for your cooperation and support towards the community for providing a water well and purification system to our communities.

May the almighty Allah bless all our brothers from Amanah Relief Center (ARC) and our beloved donors with Jennatul Firdausi AMIN. We call for your cooperation and support by working together with Paicho Muslim Center (PCM) to support more poor communities of Uganda Africa insha'Allah.

**Brother Musa at the water purification & water well distribution area in Mbale District, Uganda.**

***Collaboration plaque for the water purification & water well in Uganda.***

# TESTIMONY

*Ustadz Joko*

From Ustadz Joko - Maluku:

On behalf of the leadership and all the administrators of the Qurrata A'yun Islamic Boarding School, we would like to thank Ustadz Harris and ARC who have helped a lot in terms of money, goods, and goat farming. Hopefully, Allah will reward everything for Ustadz Harris, ARC, and the donors.

I would like to say firstly, that the benefit of ARC contribution is that students can learn about the goat business. Secondly, the benefit of goats & milk can be sold, and it can increase the students' need for food and drink at the boarding school. And thirdly, the boarding school has a goat farming business with 11 additional goats from the initial 6 goats (2x males & 4x females).

***Original 6x purchased goats (for Ustadz Joko boarding school. 2x males, 4x females).***

***The Goat Clan after one (1) year of breeding = a total of 17 goats.***
